

DRAGLINE IRRIGATION HOSES

MEGAFLEX DRAGLINE irrigation hoses are:

- Longitudinally reinforced to prevent stretching when dragged.
- Long lasting.
- Cut and abrasion resistant.
- UV stabilised.
- Striped for easy identification.

MEGAFLEX DRAGLINE irrigation hoses have a PVC inner liner and outer cover, reinforced with polyester yarn.

INSIST ON THE HOSE WITH THE STRIPE!!

This registered stripe, exclusively to MEGAFLEX, has been designed in a manner which does not allow the printing to weaken the hose construction.

Hoses can be specially embossed to suit customers' requirements, based on minimum order quantities. All dimensions are nominal.

ASSEMBLY

The fittings must not have sharp edges or barbs. The hose should be fitted using at least one hose clamp. See page 20 Hose Assembly.

MEGAFLEX I772 Standard Duty

Nominal Internal Diameter (mm)	12	20
Pressure (kPa)		
Working	800	800
Burst	3 500	3 200
Mass per metre (g)	173	333

MEGAFLEX I775 Medium Duty

Nominal Internal Diameter (mm)	14	20
Pressure (kPa)		
Working	1 200	1 000
Burst	4 000	3 500
Mass per metre (g)	300	380

MEGAFLEX I779 Heavy Duty

SABS 645 Type II

Nominal Internal Diameter (mm)	20	
Pressure (kPa)		
Working	1 200	
Burst	4 000	
Mass per metre (g)	429	

MEGAFLEX I778 Extra Heavy Duty

SABS 645 Type II

Nominal Internal Diameter (mm)	20	25
Pressure (kPa)		
Working	1 200	1 000
Burst	4 000	3 800
Mass per metre (g)	432	578
